

Mehmet Ardiç

FRONTEND DEVELOPER

+90 (534) 793 59 43 - ardicmehmet96@gmail.com - LinkedIn - GitHub - Eskişehir/Türkiye

I'm a Computer Engineer and Frontend Developer with a passion for software development. I have a good mix of technical skills and I enjoy coming up with innovative solutions. I work well in teams and pick up new things quickly, which helps me make a solid contribution to different projects. I focus on user needs and always aim for quality and functionality throughout a project. I'm really looking forward to new opportunities to grow and learn

HARD SKILLS

HTML5/CSS3/SASS
Responsive/Adaptive design
GIT / Bitbucket
JavaScript
Typescript

React
Redux /Context API
REST API
Tailwind / Bootstrap

Node JS (Express js)
Mongo DB
Postgre SQL

PROJECTS

Green Harvest

Github

2024

As a Scrum Master/Developer, I worked on a group project on GitHub. In the project, I managed task distribution using Trello, checked off completed tasks, and coded some sections. I also organized the scrums.

Tech stacks : Html5, Css3, Js, Responsive Design and Retina Display supported

Contacts App

Github

2024

I made an application with React that includes login and registration pages, stores and deletes phone numbers and names, and also performs real-time data exchange with a remote server via an API.

The technologies I used: React, Redux Toolkit, Redux Persist, React Router, Helmet Provider, Suspense and Lazy Loading, Tailwind, Framer Motion.

Store Page

Github

2024

I developed an e-commerce website using React. For this project, I utilized several tools and libraries: Redux Toolkit for state management, React Router for navigation, Tailwind for styling, Axios for making API requests, React Simple Rating for handling ratings, and React Loader Snippet for loading indicators.

EXPERIENCE

Kreatif İşler

Sep 2024-present

Robotics Coding Instructor

As a robotics coding instructor, I teach children Python, Mblock, Scratch, Web development, and 3D modeling

Corebit Tech A.Ş.

Full Stack developer

Oct 2021-2022

I developed solutions for both the frontend and backend of the Bizitravel application, which addresses travel and accommodation issues for companies. On the frontend, we were using HTML5, CSS3, JavaScript, Bootstrap, and Angular to develop solutions. On the backend, we used node.js, aws for the cloud system and SQL (MySQL) for the database

EDUCATION

IT School GoIT

2024-present

Full Stack Developer

Çanakkale Onsekiz Mart University

2014-2020

Bachelor's Degree in Computer Engineering

LANGUAGES

English / Intermediate

Turkish / Native
